Paragraph on a Scene at a Milk Booth

The milk is very necessary for us. It is used to make different kinds of eatables. It keeps our bodies and minds healthy.

The milk is very necessary for all of us. It is very important for children. It helps them in their growth. The milk gives us energy and keeps us healthy. The milk gives strength to our body to fight different kinds of diseases.

But there is a shortage of milk in our country. To get milk is a problem in big cities. The people get milk booths. There is one such milk depot in my colony also. It is situated outside of our colony. I went there on foot. I saw there was a great rush at the booth. There was a long queue of people. They were getting milk turn by turn. The people had pots, bottles, and cans in their hands. It seemed that the queue had no end. Some people were coming and standing at the tail of the queue. Others were leaving after taking milk. Someone tried to break the queue. Others shouted at him and set him right. Some tried to take milk without standing in the queue. They were pulled back by others. All sorts of people were found there. It was very interesting to listen to these people speaking. The scene at the milk booth was very interesting. But it is really very boring to stand in a long queue and keep on waiting. The government should take steps to solve to make problems.
