**Subject:** Private vehicles as a pandora of obstacles in Delhi

Sir,

Through the columns of your reputed newspaper, I want to highlight that Delhi is turning into a pandora of problems due to the intensity of pollution, private vehicles, traffic jams, wastage of money, materials, and manpower. In order to have a smooth flow of traffic, the roads have been widened and flyovers have been built by the government. The traffic police have also been deployed to control the traffic but one can find congestion, traffic jams, and pollution in Delhi. The private vehicles of different types go in the morning over the roads and their number is multiplying faster than the population. a pedestrian or a cyclist can hardly get a chance to move safely. The *auto-rickshaws, taxis, maxi-cabs*

***phat Sewa, school taxis, two-wheelers, private vehicles, etc. do not allow the roads to have a rest even for a single second. The government has spent a lot on flyovers to control the traffic but the result is far from satisfactory. These are all health hazards and troublesome for our survival.***

**It is the need of the hour that the government should frame a tangible policy for this congested traffic. Like Japan and pairs, certain renovated modes are put into operation for the *smooth flow of pollution, traffic jams, and wastage of funds*, etc. In Japan only a particular number of vehicles can be plied on a specific day. They have adopted smooth and sound suitable solutions.**
