

Expository Essay on Importance of Education

Education is a valuable resource in acquiring skills and knowledge. Our education begins at home. Then, as we grow older, we go to schools, colleges, and other educational institutions.

Education brings positive changes in a person's life. It enhances one's knowledge, skills, and intellect and enables one to lead a more productive life.

Children's education: Children or children start going to school for primary or secondary education. It is considered a human right for every child to have the opportunity to learn. Schooling lays the foundation for a child's future.

A baby girl is just as important as a baby boy. He also has the right to go to school. Her requests for education should not be violated in any way.

Education in colleges, universities, and institutions of higher learning: After graduating from high school, a student may consider joining a college or higher education institute. They may obtain a bachelor's or master's degree or enter a professional centre to receive specialized training skills.

Adult Education: Illiteracy is a social evil. An illiterate person finds it very difficult to cope with various life situations, including learning to write or count arithmetic. Today, men and women alike go to educational institutions to learn the basics of education. These adults receive instruction related to health and hygiene.

Women's Education: Educating women is essential in strengthening women's position in society. An educated modern woman gives due importance to her public life as well. Education expanded his vision. It helps to develop his personality.

Benefits of education:

Education makes us humble. Education creates awareness and broadens our horizons. We become more aware of ourselves, society, and everything that surrounds us and affects our lives. It helps us to cultivate a positive attitude. Also, discipline is essential for everything a person wants to achieve in life. An educated person wants to be respected in society. Education enables us to earn a living.

Education gives us the ability to get a good job. We need money to live. With the advancement of science and technology, our needs have grown exponentially. Apart from the necessities of life such as food, shelter and clothing, we also need other luxuries such as cell phones, air-conditioners, cars, etc.

Satisfying work ensures a satisfying life. It is a well-known fact that an educated person gets it—better chances of profit. After graduating, we might consider starting our own business. And we can be experts in the field of our art. Computer science, software, and information technology

research will enable us to make choices in the fast-growing IT sector and the internet industry. We can help illiterate adults learn essential reading, writing and math skills. Importance

Education is critical to ending the problem of unemployment in our country. It is also essential to improve trade and commerce and bring prosperity to our country. However, in addition to the advanced education system, there is a growing need for vocational education.

CONCLUSION

The learner should be familiar with history, geography, religion, culture and traditions, in general education. Therefore, public education should educate all students up to the second level. Then, depending on the student's ability, they should choose a higher education or join a skills training institute to receive skills training.
