Expository Essay on Online Learning

Online education means the use of electronic systems and learning processes. For online education, essential communications include internet connection, computers, smartphones, etc.

Introduction

Education is an integral part of our lives; it can affect our future, and if not correctly cared for, it will be ruined. The learning and teaching process in online education takes place through an electronic medium made up of digital forums. Allows students to gain academic knowledge through technology.

Share with Us the Latest Updates

Online education includes how to learn and teach electronically. It takes place outside the classroom through digital forums and can be delivered through tutorials, animation, audio, video, and photos.

Current and Future of Online Education

In an age of change, when everything is digital today, the education sector is also not far behind in this regard. A pandemic such as Coronavirus (or Covid-19) has affected virtually every aspect of human life, including education. Therefore, there is a need to improve online education today.

The Indian government has launched the 'Bharat Padhe Online Campaign' to reduce the loss of education during the Covid-19 epidemic, which emphasises the growing importance of online education. The value of online education will continue to grow in the present and the future. Still, we must remember that there are some practical barriers to the benefits of online education due to what needs to be embraced. Carefully.

The impact of online education on Lockdown

COVID-19 closes schools around the world. Worldwide, over 1.2 billion children drop out of class. As a result, education has changed totally with the growth of e-learning, with teaching taking place on digital platforms.

Due to the massive demand for online education, many online learning forums offer their services free of charge, including venues such as BYJU'S, Unacademy, Career will, CBSE Digital Education, etc.

Benefits of Online Education

There is not a single school-college in a country as large as India. By choosing online education, the pressure on schools and colleges will be reduced, and there will be freedom for parents and children to learn and teach in their way. That is, the need for admission to a school college will end.

By promoting online education, students will gain new knowledge. Allegations of a shortage of teachers can also be removed.

Classroom teaching is made more interesting with online education because children pay more attention to it.

Online education is also profitable because relying on the Internet will reduce copies and books.

Learning online saves time, as well as a greater diversity of information.

With the help of online education, students can get quality education at the best universities and teachers in the world.

The Dangers of Internet Education

Online education is related to a computer-based network, which requires many expensive devices. Because of this, everyone can't get an online education.

According to a new study, online education disrupts children's physical and mental health.

The home environment will not be conducive to online learning, as students may be distracted by games, social media (Facebook, WhatsApp, Instagram, etc.) at home. At the same time, schools and colleges have an organised learning environment.

No matter how much the institution has online and digital education available to students, the institution promotes lousy learning habits, and a lazy attitude grows in students.

Online education can affect students' reading ability because they cannot be an active part of research and lose their motivation.

Conclusion

It can be said about online education that there are specific challenges in online education that need to be overcome. Also, the benefits of online education are many in the current context. Online education has grown significantly due to the digital age and the Covid-19 Pandemic.

Indeed, if we look at the situation today, it can be said that the future of online education is very bright and is transforming the education sector.
